

INDEX TO VOLUME VIII

Bailey, W. N. An integral representation for the product of two Whittaker functions	51
— A new proof of Dixon's theorem on hypergeometric series	113
— Associated hypergeometric series	115
Burchall, J. L., and Chaundy, T. W. A type of 'magic square' in Tarry's problem	119
Cartwright, M. L. The exceptional values of functions with a non-enumerable set of essential singularities	303
Chaundy, T. W. Partial differential equations with constant coefficients (II)	280
— and Launchbury, H. R. Systems of ordinary differential equations with constant coefficients	214
— See also Burchall, J. L.	
Chowla, I. A theorem on the addition of residue classes: Application to the number $\Gamma(k)$ in Waring's problem	99
Davenport, H. On some infinite series involving arithmetical functions	8
— On some infinite series involving arithmetical functions (II)	313
— On primitive roots in finite fields	308
Dickson, L. E. New Waring theorems for polygonal numbers	62
Dixon, A. L., and Ferrar, W. L. On the summation formulae of Voronoï and Poisson	66
Erdélyi, A. Der Zusammenhang zwischen verschiedenen Integraldarstellungen hypergeometrischer Funktionen	200
— Integraldarstellungen hypergeometrischer Funktionen	267
Estermann, T. A new result in the additive prime-number theory	32
Ferrar, W. L. See Dixon, A. L.	
Ganapathy Iyer, V. A note on integral functions of order one	103
— Some properties of integral functions of finite order	131
Hardy, G. H. Ramanujan and the theory of Fourier transforms	245
— and Littlewood, J. E. Notes on the theory of series (XX): Generalizations of a theorem of Paley	161
Ingham, A. E. On the 'high-indices theorem' of Hardy and Littlewood	1
— On the difference between consecutive primes	255
Ko, Chao. On the representation of a quadratic form as a sum of squares of linear forms	81
Kober, H. Eine Verallgemeinerung der Transformationen vom Fourier-Typ	172
— Hankelsche Transformationen	186
Launchbury, H. R. See Chaundy, T. W.	
Littlewood, J. E. See Hardy, G. H.	
Milne, E. A. The acceleration-formula for a substratum and the principle of inertia	22
Mordell, L. J. Homogeneous linear forms in algebraic fields	54
— An application of quaternions to the representation of a binary quadratic form as a sum of four linear squares	58

Morton, V. C. The triple tangent planes of a cubic surface . . .	238
Newman, M. H. A., and Whitehead, J. H. C. On the group of a certain linkage . . .	14
Pidduck, F. B. Electrical notes. X. Multiple orbits in the magnetron . . .	75
Ruse, H. S. On Whittaker's electromagnetic 'scalar potentials' . .	148
Titchmarsh, E. C. The mean-value of $ \zeta(\frac{1}{2} + it) ^4$. . .	107
Traber, R. E. A fundamental lemma on normal coordinates and its applications . . .	142
Venkatachaliengar, K. A simple proof of the Jordan-curve theorem . . .	241
Watson, G. N. A note on Spence's logarithmic transcendant . .	39
— A note on Lerch's functions . . .	43
Whitehead, J. H. C. Certain equations in the algebra of a semi-simple infinitesimal group . . .	220
— See also Newman, M. H. A. . . .	
Wright, E. Maitland. On Tarry's problem (III) . . .	48
— The representation of a number as a sum of four 'almost equal' squares . . .	278
